~~SECRET~~

OC-2009-85
31 January 1985

MEMORANDUM FOR: Director of Communications

25X1 FROM:

[REDACTED]

Chief, Management and Liaison Staff, OC

SUBJECT: Weekly Staff Notes, 21-25 January 1985

25X1 1. DDA/MS reported that the [REDACTED] computer relocation
25X1 study draft has been completed but will not be coordinated with
affected DDA offices. [REDACTED] will brief the DCI and the DDCI on
the study in March.

25X1 2. MLS is drafting a new version of the [REDACTED] NSDD. There is
currently high interest at the NSC to get the NSDD published in
the near term.

3. PPBG has received FY-87 Program guidance from the DDA
which includes a request to identify the lowest priority
activities equivalent to seven percent of Base and Ongoing level
resources.

4 All seven of OC's New Initiatives made the "cut" in the
DDA ranking exercise. Several were rewritten to provide clearer
"layman" statements regarding purpose, impact, etc., when
reviewed at the Executive Committee level.

5. A series of statements describing the unique attributes
of CIA communications was furnished to the DDA for the DCI's use
in briefing the House Permanent Select Committee on Intelligence.

6. PPBG met with OC-AMD/B&F to review ways to more
effectively monitor and control FAN obligations/commitments and
to eliminate deficit spending in SOCs. Progress is being made
and closer coordination is being realized.

SUBJECT: Weekly Staff Notes - 21-25 January 1985

8. As a first step toward developing a program review system for the Office, a list of projects was compiled based upon input provided to SINAG by each OC Division. Approximately 120 separate projects falling into 16 different categories were identified in this "first cut" effort.

25X1

10. Project SURGE - The Materiel Management Branch is in the process of verifying that equipments involved in this effort are either on site, in area stocks, in shipping channels or due in from the vendor with follow on requests to ship to particular destination immediately upon receipt. Early indications are that the project is on track with no known major glitches.

11. Foreign Ownership Control and Influence (FOCI) - FOCI, at least for the foreseeable future, is here to stay. This program seriously impacts on OC as a good deal of network equipments, such as modems, are manufactured by corporations that are owned, at least partially, by foreign interests. The Office of Logistics has an FOCI panel that meets on individual requests for equipment, but to give OC as well as OL some latitude over the coming months, an office-wide solution must be generated. To this end, we will meet with Division Chiefs early on in the coming week to discuss possible strategies to find a middle ground that will follow the mandated policy as well as giving us the where with all to continue to support ongoing, new and unexpected requirements.
